Testing Objectives

This section presents a concise overview of the planned penetration testing engagement. It outlines the client's expectations from the testing and their specific requirements. It also provides a high-level overview of the planned testing scenarios and testing methodologies that are planned to be used.

Scope

Detailed scope of the testing is provided including assets like, internal / external network ranges, domain names, endpoint applications, web application or service URLs.

Testing Plan

High level overview of the testing scenarios and test cases that were planned and tailored to the tested target.

Test Schedule

Proposed testing timeline is provided.

Deliverables

Listing of documentation and support that will be provided as a part of this engagement.

Permission Memo

Memo that grants authorization to specific members of the Z-Labs company to conduct vulnerability assessments and penetration testing against the target.
