Your Awesome API - Penetration Testing Final Report	1
Tested Target	1
Engagement Facts	1
Executive Summary	3
Methodology	3
Summary of Findings	3
Finding Details	3
Appendices	3
Appendix A: Risk Classification	3
Appendix B: Security Analyst’s Bio	3

Executive Summary

Summary of testing process and overview of security posture of the tested application. Highlighting most critical discoveries and proposing mitigation strategies.

Methodology

Summary of the testing scope and the completion of the test plan as well as any specific rules of engagement that were discussed with and accepted by the client during pre-engagement phase.

Summary of Findings

Listing of the penetration testing findings together with severity level and status.

Finding Details

Detailed list of vulnerability discovered during the penetration testing. Each entry in addition to actionable description consists of severity level, steps to reproduce (if applicable) and remediation recommendations.

Appendices

Appendix A: Risk Classification

Description of severity levels used.

Appendix B: Security Analyst's Bio

Short bio notice about security experts that conducted the testing and prepared this report.
